# Color Palette

The purpose of this document is to see which colors look best on a printed copy. Thus, it is recommended to print this PDF and then adapt the settings in the main class file `thesis-michele.cls`. First, the default colors will be shown, and then some other colors that proved to look nice on paper.

The main reason why I decided to add this file is because the TU Delft printers do not do a good job at representing some of the colors used. In this way you can easily set the colors you prefer.

## Default Theme Colors

### Light Gray

This is some text in the `lightGray` color.
This is some text in the white, with `lightGray` background.

### Mid Gray

This is some text in the `midGray` color.
This is some text in the white, with `midGray` background.

### Dark Gray

This is some text in the `darkGray` color.
This is some text in the white, with `darkGray` background.

## Other Theme Colors

This is some text in the `(141,142,143)` color.
This is some text in the white, with `(141,142,143)` background.

This is some text in the `(140,142,144)` color.
This is some text in the white, with `(140,142,144)` background.

This is some text in the `(114,115,116)` color.
This is some text in the white, with `(114,115,116)` background.

This is some text in the `(113,115,117)` color.
This is some text in the white, with `(113,115,117)` background.
